So I noticed EA was trying to bait people into wanting C&C pins. If you guys are interested, we can approach other communities and get them remade again.

I can take the high-res 3D models I have of the GDI/Nod logos and use them as templates for a pin manufacturer. If we get enough money I (or whoever wants to manage this, I don't care) can place an order to get them custom made for anyone who wants a set.

Anyone interested?
