## Subject: [SSGM 4.0 Plugin] Set Deaths Console Command Posted by iRANian on Tue, 17 Jul 2012 12:01:23 GMT

View Forum Message <> Reply to Message

This plugin will add a console command to the FDS that will allow you to set the deaths count of a player (negative numbers are accepted and work). The following console command is added:

SETDEATHS <ID> <VALUE> - changes the deaths count of a player.

To install place 'SetDeathsConsoleCommand.dll' inside your root FDS folder and add an entry for it under [Plugins] in SSGM.ini.

You can contact me under the nick 'iRANian' on renegadeforums.com
