---

The following fixes are included:

- Prevented players from beaconing the middle to damage/destroy the Barracks.
- Added a kill zone to prevent the "getting off map" exploit.
- Prevented players from planting beacons on places you're not supposed to be able to stand on for both team's Refinery.
- Added vehicle kill zones in front of doors to prevent players from placing vehicle inside buildings.
- Slightly increased the size of the Pedestal bounding box to fix an issue where beacons placed on certain parts of the Pedestal aren't registered as Pedestal beacons.
