To fl00d3d, if you are so experienced...in programming/hacking/cracking what the hell do you need the source code for???

You are still to prove that you can crack/hack whatever I said can't be (note you didn't say it must be concerned with gaming) cracked/hacked, refer to post

<http://www.renegadeforums.com/viewtopic.php?t=7085&start=75>

To all peeps out there , here is a group of people who cares and is trying to make Renegade better for the majority of people who play online. Whether you prefer to trust them, keep things as they are and play on servers without RenGuard (with cheaters) or don't play at all, at the end of the day is upto you. Thats the choice that you are going to have to make.

To the RenGuard team, I think what you are doing is great, keep up the good work and I'm sure 95-99% of the people who play renegade on-line will enjoy the cheat-free gameplay.

Cheers,
D.
