Reborn, no matter the excuse, STILL let someone/did cheat using scripts 4.0 source. And his current excuse has him breaking TWO common sense rules, especially to someone like him. No matter the cause, he should be banned.

Good One Driver did not release that HUD. The HUD in the Screenshot was the D6 4.0 HUD that was released by someone else a while ago. Even I use it. So a HUD isn't an excuse to point fingers.
