whoever this guy is just added an aimbot to his cheat

Quote:Hey peeps!

So TT servers can get a screen shot of your game, so making a visible radar hack seems like a pretty silly idea, even if you can switch it on & off.

I've been having some fun with an aimbot hack tho, its not without its flaws though, as the reticle 'snaps' to the closest enemy.
I think making it lock onto one target only, and turn itself off after killing him is probably going to be the way forward.

Anyway, have a look at the video and let me know what you think.
