VuLTiMa wrote on Wed, 01 August 2012 11:39Xpert when I was moderating at Atomix, something happened regarding someone joining on a TT nick and cheating, who was this?

Im 90% that at some point in atomix the name "redude" name or w/e was banned, but I think in the end it was just put down to using a shared serial

Your memory is a little vague lol.

That person was inetkngeek and he wasn't running 4.0 during that time, not even a private beta. And it wasn't a spoofer, it was actually him. He had *cheat name removed*but then admitted to it after the video proof was showned.
