Whitedragon wrote on Sat, 04 August 2012 16:17You could easily make this as a server side mod. Clients running 1.9 or higher would see the stealth toggled correctly, stock clients would see the SBH always stealthed like usual. You could use a keyhook to toggle stealth, or maybe give them a special weapon that activates stealth when equipped. The ammo count of this weapon could be the stealth timer, too.

Wouldn't the client have to download the moded version?
