You could just add a dnsban* bb.sky.com

That would probably keep him out, unless he tries to use a proxy.

bb.sky.com is a fairly common ISP. I wouldn't recommend banning it.

The amount of rene-players using it would be rather limited though. I know of communities that have already banned this dns address and I'd advise you to do the same. Just make sure you create some form of whitelist so that when players post on your forums that they can't play and your certain that they're not this guy, you can add them to the whitelist.
