Starting Over
I lost the source code and files for most of the Coop maps i made and we are going to redo them from scratch. meaning Joipa, Boarding_Party and maps like that i did before. They will be made better i hope

Use Level-ReEdit on them. That's what I did with Boarding_Party to understand how you did the map.

May I also suggest just editing the current single player maps so people who don't run 4.0 can play also. This is just so people who aren't familiar with scripts can also play these games without a 3rd party download. That's why I loved Jessica's co-op a lot. I still have her maps and mod. If I had the time, I would work on it and fix bugs and add more features to it but I simply don't have any time in my schedule to do it.
