Infinitttheres not standerd size, have you ever noticed the mammoth tank is 3 times the size of a hummer.

I realize there is no standard size, example, the nod apc and flamer cant get through the buildings on city and city flying. I was wondering if anyone knew the sizes for all the vehicles so the could post something like.

Hummer W:?? H:?? L:??

Stank W:?? H:?? L:??
