hahaha 99 names in a week

No one likes you .

I seeing nothing wrong when iran publicly posts about the the bug,
gives detail info about it,
and basically tells the tt team how to fix.
He has helped renegade in that aspect countless times.
I doubt iran has been cashing crashes on that server.

of a punishment when he doesn't play there anyways
You can have him, maybe he'll find more exploits and crash your server like last year.

that would be good.
