iRANian wrote on Wed, 29 August 2012 03:48 You and him just happen to be pretty much the only british guys using dazzle.ini from Fjords, use the same two difference aspect ratios for in-game footage in videos, use the same intro text settings for windows live movie maker, use the same encoding settings, both have the exact same HD resolutions on youtube, use the same terminology to describe videos, listen to the similar garbage music and he just happens to leak the code from you. You also started playing renegade a lot after you got caught on jelly marathon so i'm not exactly sure how you didnt notice someone using teamviewer multiple times to play on multiple servers via your pc.

So who were the people who had access to your teamviewer?

I have no idea who else has Dazzle from fjords. I'm sure it can't be limited to myself and 0x91, though.

Quite honestly, I'm not sure how you would know how many British people have it, either. Where would you get that information?

Is there a list of people who have Dazzle.ini cut by geographic region?

I'm pretty sure that the in-game resolution is different for most of the video's. Mine are consistantly the same.

Regarding the aspect ratio, I always use Windows Movia Maker and apply the highest settings. I don't know much about it, or what that would prove or dis-prove?

I'm guessing it means we might have the same size monitor or something?

Granted, the text seems very similar, but MDK for example goes to such lengths as to make fake facebook accounts to get personal information from other players. My youtube account has been active for years, and the movies are public. It isn't hard to find them, or emulate them. It's like me buying a red t-shirt months ago, and being accused of murder because some dude purchased he same red t-shirt that he knew I purchased, and then he killed someone.

I'm pretty sure that most people upload in HD if they can? Using the highest settings in Movie Maker will do that.

I do not acknowledge that the music is similar, but even if it was, it would be entirely possible for them to download the same music as me and apply it to their music, making it even more convincing.

Why does me playing renegade more often have anything to do with it. Especially after the event? Surely if I was playing lots, and then suddenly stopped playing after being caught might lead you to that conclusion, rather than the other way round?

I go to work, and I used to leave teamviewer running, allowing anyone to connect on the same password. It would be easy to not notice someone connecting, as I am not at home on my PC 24 hours a day.

Lots of people had access, I do not even know now as there have been so many people connect over years. I am reasonably sure that the following people connected with renegade have connected at some point:

StealthEye
SaberHawk
jnz
Campa
Omar007
Oxi
Strike
Dead6re
v00d00
Zunnie
GhostSWT

That list is small, but there are lots of other people that added me over time to msn and just asked for help, I can't remember them all, and my msn list has not been cleaned since I created it over a decade ago.

There are any number of people that could of connected, or given the connection details to someone else. It's impossible for me to tell.

I'm sorry if you don't believe me, but it's the truth.
All I have ever done is try to contribute.
