Some poeple added me asking for help with level edit or programming. Sometimes I would join there PC, sometimes tey would join mine if they didn't have the tools installed, or to see how I did/do something.

Sometimes I would ask other people for help, which is pretty much limited to the people in that list.

I can't remember whether xpert joined or not. I know a while ago I was helping him with a no-reload mod.

Yes, I would leave teamviewer running. I would use it to remote to my PC from work or my iPad if I needed to.

Yes, I am aware how stupid it was.
