or have bloom disabled by default; it's harsh

yes definitely...good suggestion

I would like the Mammoth rocket backblasts to be lowered. I see a massive puff of white smoke that takes up the centre of the screen and lowers visibility everytime I fire rockets.

edit: also that door mine glitch is ridiculous! One can just blow up mines in a doorway by wall-walking the sides outside the door...what a bullshit amateur glitch lol...should be removed from any game. Please fix so it is no longer possible!

You're aware that you could do this like, forever? If you place your mines carefully you can prevent that from happening.
