Just reinstalled Ren on my new computer. My ping is fine, KPBS seems stable, SFPS is fine, but my FPS keeps going from 300 (up to 500) to 6-12 any time I open a menu, enter a vehicle, or start shooting (ended up in quite a bit of credits lost). I'm using the 4.0.5Beta from TiberianTechnologies. Has anyone else had this problem? Does anyone know of a resolution? The game is 99% unplayable because of this -well...garbage.
