Xpert wrote on Thu, 13 September 2012 20:38The servers are there, just not showing up to the clients. Think of it like an IRC netsplit. Just restart your server and it will be fixed.

I dont know all servers stayed on without some disconnection at least on my side. Same RC there still play players:

A00000005 RenCorner Marathon (19/50) C&C Field 0/50 DE, LA, TR, DG, BR, SW

Then why it doesnt show restarted servers on that BI site?

When will be all servers restarted you will all see in ren listings and BI site will be without servers
For me it looks like 2 xwis servers Funny
