Exactly these three files will appear in !cheattest results if you have standard SBH and beacon emitters from Good-one-driver installed (I tested it).

The ban is for refusing a test, actually he took screenshots but after he realized why I want those he said he will not send us screenshots and left the game.

Also, I think we can expect him evading..

lololololol

such a useful anticheat function, shame 4.0 made it (relatively) useless

Edit: LOL at MDK's post, "written out of hate," I have never spoken to Mikey in my entire rene-life, I can just plainly see he's a fucking retard from his posts on TmX + he was fucking raped on Jelly with SBH emitters. That's all I have to say about that.
