fact is crushy its all these power hungry keyboard warriors aka mods ?

I have seen more mods run players out of the game than anything be it bans for silly reasons or hate bans as for the cheaters fck them .

at some point there may be 2 real servers left and maybe 50 players max .

seen this happen in other games I once loved quake/doom oh and MDK and yes MDK is a game ? watched as keyboard warriors slowly force out or put of players till none is left .

its renwars and there can be only one
