Now I know for a fact that you are arguing just for the sake of arguing!

Dude, I said VERY clearly that it was possible. Is it not? Everything is possible. Now, assuming everything you told me is true (because to be honest I quickly skimmed your post) that's quite an impressive algorithm. Perhaps with the invention of powerful computers we will save time. But I, by no means, claim to be able to crack that in my head. But thank you for the compliment!

Alrighty, last post here.

Nice talking with you.

Regards,
