her regular job has shifts that all conflict with her class schedule

rather than not work at all (aside from one day a week at her normal job), she got a second one at Starbucks

i got home from work 20 minutes ago lol

not sure how or why you expect MDK to stop; how's he supposed to stop if he won't even start taking his medication

Ethenal is in college

you've probably never been to college, so i don't expect you to know much about it
