Yea true but it looks as if that are just spitting out little 10 min models and skins just to make a mod out there but everthing can be tweaked right? I could make a couple tank models for you guys if you want ill post a pic on one but in needs to be uvw unwrapped, skinned boned. Same as Laser I dont want to be mean but if you/we put a little more effort it could look twice as good. Erm why dont we let them come out with the beta then critise they have made some awesome progress right? Yea they have! So give them a chance before wo go and put them down.
