The guy comes off as a douchebag to me, and consistently likes linking our forums here (which cause of the drama around here, i've wanted to avoid) just to point and laugh at it.
Ha, and Iran's not even a representative of Jelly - yet shitstain, a "Head Administrator" likes to post links to Jelly topics that reinforce (in his head) that Jelly is the devil.

Mad? I'm not one trying to shut you out from my community. In fact, I really don't give a fuck what you do, you sit there all day trolling forums and coding half assed plugins for a game 10+ years old, I pity you.

And he doesn't even spend his own personal livelihood to run an online video game server and HE'S the pathetic one - I don't think that you or he is pathetic, I'm just using your pathetic logic (although it could be very well that you do not pay for your server). People who throw stones should not live in glass houses.

Why would I blame anyone but yourself for crashing my server if you decide to make and release a hack, join my server and spam the fuck out of something that is normally spam protected and my server goes down (admittedly irrelevantly) right after you stop doing it?

Why? Probably because of what you just said - admittedly, the crashing was irrelevant. How difficult is that, LOL
