Played in UltraAOW server, it auto-downloaded a map and played in game.
Exited that server, enter another and got popup block from Anticheat stating MNATR_LIFT.w3d was found...
Found that file in C:\Users\Windows\AppData\Roaming\Renegade\Client\ttfs\files and deleted it.
Was then able to join other server..

Anyone else encountered this?

Not good if servers are injecting suspected cheat files on map downloads...
