Subject: Re: Installing TT with The first decade
Posted by Omar007 on Fri, 14 Dec 2012 23:05:19 GMT

As you are using The First Decade, the folder selected by the TT installer is possibly incorrect. By default, the TFD installer installs to C&C folders with the '(tm)' suffix. The registry keys don't include those so the TT installer will select the wrong folder.

Sample:
TFD Install Path: C:\Program Files\Command & Conquer The First Decade(tm)\Renegade

TT detected: C:\Program Files\Command & Conquer The First Decade\Renegade

But since that folder does not exist (or not a valid Renegade installation), TT won't allow you to continue untill you select the right path.

EDIT: Per your other topic I see you already fixed it. At least this post lets you know what the problem was.
