I am not saying we will ban you just for that, but if we suspect you are cheating we will ban you. Even if we cannot prove it.
Although that does not happen very often that we do this. You'd be the first actually.

Most players during that game thought you were cheating, as well as a bunch of our moderators. The only reason we did not take any action (yet) is because we do not have proof.

iFag can be banned just for beeing a pain in the ass, that along qualifies him for beeing banned, you dont want Pricks like him beeing a regular on teh Server, trust me :/ Besides that, using TB cant be catched anyways therefore good luck in trying to get proof on him, it wont happen :/
