Yeah, "riiight," I haven't a clue of what I'm talking about. Obviously I'm just some random newbie saying gameplay won't be good. I picked this up in the bargain bin yesterday!!

You do realize I've been playing this game for almost two years. I had to suffer through Under and Field during the beta test and I know what makes a level have a choke like that. Sure, there's two entrances per base in this one, but the base defenses will slaughter units as they come through the tight entrances.

But no, I don't know anything. :rolleyes:
