The installer will now try the following paths in case it fails to detect the location from the registry:

C:\Program Files\Command & Conquer The First Decade(tm)\Renegade
C:\Westwood\Renegade

(If program files is located in a different location, e.g. c:\Program Files (x86), then that is used instead.)

Omar007, is that the exact path? No space before "(tm)"? game.exe is located in C:\Program Files\Command & Conquer The First Decade(tm)\Renegade\game.exe?

[edit]
From another topic, I found:

C:\Program Files\EA Games\Command & Conquer The First Decade(tm)\Command & Conquer Renegade(tm)\Renegade
