liquidv2 wrote on Sat, 16 February 2013 00:59i like that you hit !irc for each screen; subtle advertising lol
the thing that would bother me with this is the health and ammo part taking up so much of the screen

and the weapon, credits, and time box looks too plain with the original font; i'd pick something that looks newer so the style keeps up with the rest of the HUD
same with the little direction box - rest of it is legit

Haha yeah, and the thing is I am on 800x600 so the hud is super big for me but for everyone else with a bigger res it will be way smaller, the problem with "bottom text" is that 4.0. doesn't allow that to be edited, the only thing you can do with that is remove it. Thank you for your input

@Blacky, yeah I play with it cause it's easier to snipe and gives me way better fps.
