If possible in a future version could the anticheat display where the file that is being blocked is located? It would greatly help in pinning down what files are causing problems.

Something along the lines of:

You have been blocked for an invalid file: /stealthskin.dds

You have been blocked for an invalid file: always.dat/model.w3d

You have been blocked for an invalid file: C&C_Under.mix/sound.wav

Thanks.
