CrimsonSorry, I think Greiver is spamming... when I go to the Win32FDS forum and you've replied to EVERY THREAD... there is a problem.

Before you hit submit, think if what you've posted is worth the download time and reading time.

I can easily remove post counts from your posts... I believe those are one of the stats I had to manually modify phpBB to pull out of the database.

if you think that it will help, by all means, remove my "Spam" counts.
