While I don't really like Iran, I can't see any legitimate reason for him being banned.

As has previously been stated, trigger bot is blocked with the latest version of 4.0. If your running 4.0 server-side and he's running it client-side. There is NO way in which he can cheat.

Granted he's an annoying prat, but he shouldn't really be banned for "suspected" cheating.

As for Vultima, he too is very outspoken.. but if you don't like what he's saying about your server you should just give him a permanent mute in your server and/or ban him on your forums. until he behaves. There's not that many players left on Renegade...servers need to co-operate and allow players to play there peacefully.

I like you Zunnie, but I feel you've made a mistake in judgement here mate.

Your server is active and for good reason, you have a good setup going, if your going to break one of the basic rules of being fair on your server such as banning without evidence, then the server's reputation isn't going to be as good. Players are going to be worried about being banned, unless your just making a example out of Iran? I know he's caused a lot of problems and your well within your rights to ban whoever you like, as it's your server..but this still feels wrong.
