Package might work, but then you have the 0 bug... Have you verified that bug still exist in TT?
Did you guys make it so the client reloads armor.ini on every mix/pkg load (from the mix/pkg if said mix/pkg has armor.ini, otherwise from always.ini if not present). If you have then the bug will be fixed, if not it will still exist.
I'm not sure of that, but I know that the 0 bug for normal maps should've been fixed.
