NACHO-ARG wrote on Sat, 01 June 2013 17:21how the fuck can you cheat in ts? as far as i know you cant join a match if you have a rules or art.ini modified and otters wouldnt be able to join too if you created match.
you can change all the graphics in tiberian sun and still have it work online.

check out my version of ts it replaces a lot of graphics and is designed to work online with people who dont have it:
http://www.moddb.com/mods/tiberian-sun-multiplayer

 thats how they have the "fog hack" for tiberian sun and red alert 2. all you do is rename the fog graphic "shroud" which is the black stuff and then you have transparent shroud that you can see through.
