250/month for 7-8 months or so(we got some upgrades recently to bump up the price). That was for everything, windows box that has all the ren/kf servers on. VPS box that has the minecraft/webserver crap/server space rented out to a couple of people.
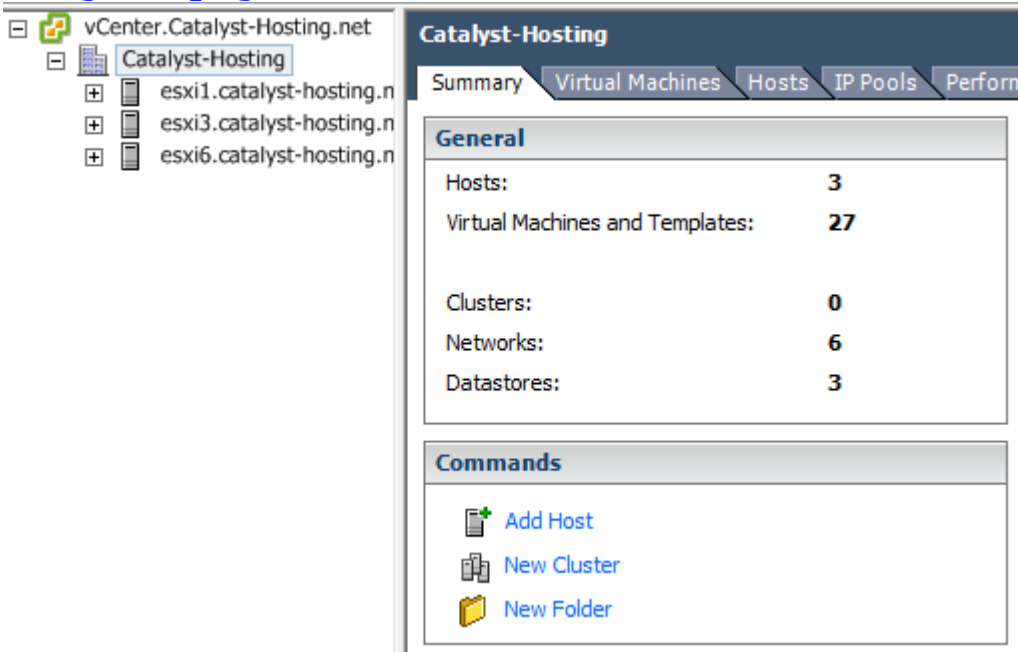

Crushu it was a simple "we're moving and leaving two people behind". At any rate my own outburst on this forum was done yesterday. I'm not throwing crap anymore at him.
