What's up guys? It's been years since I was active on this website, and I just recently found my old Renegade disks. I would love to hop into a server and and play like I used to... but I'm not sure how to. I remember I had to install some sort of update? Perhaps an even better question would be... does anyone even play Renegade anymore? It was a great game. I wouldn't be surprised if people still do. I would assume most of the Renegade playing happens on that new modded iteration of Renegade - can't quite remember what it's called. Nonetheless- Thanks in advance.
