-TLS-DJ-EYE-K wrote on Sat, 20 July 2013 23:11The Question would be what happens to the other stuff in your PC once they drop to 0... Like do you get 99% CPU usage or extremely high temp of the Graphics Card. talking of Graphics, which card do you use?

CPU stays about 35%, however I've established it's a lack of airflow combined with the GPU. Hardware issues.
