Aircraftkiller wrote on Sun, 11 August 2013 19:57I gave you great advice. I told you to make your own textures instead of using someone else's work, so you'd have full control over whatever result you wished to have. Instead, you said "HURRDURR THAT R NOT WUT I SED LOL" and decided to do what I told you from the beginning. Great listening skills, sparky.
Cool your jets ACK, don't tell me you've never made something one way, then later decided it'd look better differently?

Is the back ground in maya, or is it in LE?
