## Subject: Need help with my map!
Posted by UnitXc on Mon, 26 Aug 2013 12:25:33 GMT

hello there.

due to various extremely stressful attempts to get 3DSmax8 working propperly without crashing all the time I think im going to have to ask for somebody to help me get this map into renegade.

I may even be willing to pay a little money for this too, somebody help me get this in game working properly like any other map you would find, please!

I need help with building placement and basically everything that comes after making the map itself.
