I tried it too but it still doesn't work for me. I d/led the new client installer 3 times by now but nothing. It says completed, then I click next. When I click on the game button (doesn't matter which one, game or game2) Ren Configs come up. I click "OK" and then - nothing. I get a black screen with a white cursor and an "error beep". Nothing else shows up, no error status, nothing. Any other suggestion what I could do? I'm using TFD btw and it installs in the Renegade Folder there.

Thanks for any help or advice.
