Basically what the title says, i am making sidebar textures to look like the originals from CnC 95.

I have all of the vehicles done so far and am working on the infantry. Not all infantry have an icon from the original cnc obviously so I may make some that have the similar look to the original icons.

Also with the new sidebar features I may use this for a level that contains only the original units from cnc 95. For example flame troops will shoot in a burst that does significantly more damage than the current flame troops, and they will cost the same price as in the original. So most troops will get a nice buff but i will make fewer credits available.

Also with this you will spawn as a civilian with just a basic rep gun.
