It's ok. EWD loves finding when I'm doing things wrong and harping on about it endlessly. You didn't know you were going to give him an opening to badger me again.

The thing is: everyone bails on Renegade at some point. I am one of the few willing to continue hosting whatever needs hosting, and maintaining necessary domain registrations until the day I die. I don't trust anyone else to make that same commitment that I made 11 years ago when I bid for these forums.

This is quite literally the first time anyone has wanted me to put SSL on a game forum... and to just be asking now when the forums are barely visited at all is just plain madness.
