This was fixed internally a while ago o.o

StealthEye wrote on Wed, 04 December 2013 09:38Yes, it should, but the version of DirectX we use has changed since 4.0. (We now use DirectX 9.0c Jun 2010, the latest version of DirectX 9.0c.) So if you're seeing a message that it would not be installed then either the installer failed to run, or it did not install the right version of DirectX.

If you downloaded scripts 4.1 from here - then you shouldn't be having any problems.

Alternatively you could always download DirectX 9.0c Jun 2010 - which should also fix the issue.
