Okay, it's been awhile since I've done some coding, and I completely forgot how to do this certain piece:

Was there ever a script zone that when a unit stands in it, they can't do damage to a building?

Or is there any kind of script that exist in 4.0patch1 (NOT 4.1), that does this kind of method?

If not, can someone explain to me how I would go about doing that like say if you're an arty on the hill on hourglass, your vehicle can't damage buildings, that sort of thing.
