Indeed, that is exactly what happens.

On the related subject of packing up a modified BRenBot, the command line I use for pp is on the SVN in the Documentation folder, but for reference it is;

pp -o brenbot.exe -M POE/Filter.pm -M POE/Filter/Stream.pm -M XML/LibXML/Sax.pm -l libexpat-1_.dll -l libxml2-2_.dll -l libiconv-2_.dll -l liblzma-5_.dll -l zlib1_.dll brenbot.pl
