Yeah I was wondering that. I suppose they ship to the UK but I bet the postage will be a bit more. It depends on the company. I know SOE tried to charge \$33 to ship a Planetside game card worth \$40 to the UK which is ridiculous - just for a piece of card with a number on it!

I'd check it out before you order though, some companys charge way too much - I'm sure the US parcel as well not a letter.
