You'd need a new webserver if you was going to cover CS

No, really why would n00bstories want to cover somethig like CS? There are enough n00bs out there playing it, do we really want to hear about them? There are so many hacks for the game it would just be pointless. CaptainBigWig who is a big part of RenEvoEpoch came from CS before joining us in Planetside and he was at war with the hackers for over 2 years - he recorded over 150 hacks and was trying to always prevent them, it's a neverending battle with CS.
