The issue with the player list info not getting sent is this:

```
my %playerList = plugin::get_playerlist();  
my $numPlayers = scalar(keys %playerList);
```

```
my $i = 0;  
my $string = "";
```

```
# Send player data in batches of 15 players to avoid overrunning the length limitations  
while (my ($id, $player) = each(%playerlist))
```

```
while (my ($id, $player) = each(%playerlist))
```

'playerlist' should be 'playerList'.
