Neijwiert wrote on Wed, 02 July 2014 19:20: Actually i have the same situation. I never insert my ren disc whenever i play sp. It then also gives me that dialog of continue and cancel. However it doesnt crash, it just continues to the next lvl without playing the movie. However in the mission where you play against mutant rave and the cutscene ends right before you start to fight him. The game just freezes. Dont know if theres a different result with the cd. Havent tried yet. Cinematics are text file based, my guess is something in the Ravshaw logic got broken as I've herd numerous times that the code behind it is hacky.

Would test but I crash at the start of level one, could delete the movies from my Renegade folder assuming origin doesn't just put them back.
