This plugin is for players to view available SSGM commands.  
use !commands or !cmd

Add the command list into the ssgm.ini under [Commands]. You just add a number after the word Command for every command you want to list.

for example:

[Plugins]

00=BanSystem.dll

01=Mute.dll

02=Command.dll

[Commands]

Command1=!ping

Command2=!donate

Command3=!teamdonate

Command4=!swap

Command5=!cswap

---
